

# EPSON®

## What you will need:

- Your Epson printer
- Good quality A4 paper or card
- Scissors
- Glue
- Stapler
- Thread or ribbon

## Instructions:

1. Make sure your printer's properties are set to high quality, colour printing
2. You need 12 circles, coloured on both sides:

### Option A:

Print on both sides of the paper manually or using double-sided printing, then cut out the circles

### Option B:

Print out 24 circles, cut them out and glue two circles back to back to create one double-sided, coloured circle (let the glue dry before proceeding)

3. Fold each circle in half, then stack your 12 circles inside each other
4. Staple the circles together along the fold to keep the stack tight
5. Open up the stack so you're looking at flat, stacked circles with a stapled fold running down the middle vertically
6. Place a dab of glue near the edge of the right circle half, about a third up from the bottom. Then fold over the opposite half and glue it in place
7. Place a dab of glue on the exposed side of the circle half you just glued across, near the edge, this time about a third down from the top
8. Fold over the opposite (left) circle half and glue it in place
9. Repeat the process, alternating the position of the glue until all circle halves are glued together
10. Glue thread or ribbon to the top of your bauble and get hanging!
