What you need:

• Your Epson printer
• Good quality A4 card or thick paper
• Scissors
• Glue
• Stapler
• String or ribbon (optional)

General instructions:

1. Make sure your printer's properties are set to high quality, colour printing
2. Print out all the sheets and follow the individual instructions to build your boxes
3. Always ensure the coloured side is facing outwards when you fold the shapes
4. Place a sweet, treat or toy in each box before you seal them
5. Once you've built all the boxes, arrange them in a set (or use string or ribbon to hang up a delightful advent decoration)
**Instructions:**

1. Cut out each of the numbered labels
2. Use glue to stick a number on each box
Instructions:

1. Cut out the shape (be sure to cut around the white tab, too)
2. Fold along all the dotted lines
3. Use the tab to glue the two long ends together and form a shape like a toblerone box
4. At each of the two open ends, fold the triangular flaps down over each other and glue them in place
Instructions:

1. Cut out the shape
2. Cut out two slots in the spaces indicated
3. Fold along the four straight lines of the square shape in the centre of the design
4. Take the two ends without a slot and pinch them together to form an arch over a square base
5. Pull up the other two ends and slot them over the pinched ends to hold all four together
Instructions:

1. Cut out the shape (be sure to cut around the white tabs, too)
2. Fold along the dotted lines
3. First build the base of your bag by folding along the three tabs of the rectangle. Using those tabs glue it to the bottom of the long rectangles.
4. Use the longest tab to glue the side of the bag shut
5. Pinch the two long sides of the bag’s open top together, so the bag closes.
   The printed diagonal lines should collapse the two smaller sides inwards. If not, apply pressure to where the two diagonal lines meet to help form the shape. You should end up with a closed bag
6. Fold down the striped tab over the closed top of the bag and staple it in place
Instructions:

1. Cut out the shape (be sure to cut around the white tabs, too)
2. Fold along the edges of each of the six squares
3. Use the tabs to glue together the six sides of the box and form a cube
Instructions:

1. Cut out the shape (be sure to cut around the white tabs, too)
2. Fold along the edges of each of the four rectangles and two squares
3. Use the tabs to glue together the six sides of the carton and form a rectangular box
Instructions:

1. Cut out the shape (be sure to cut around the white tab, too)
2. Fold along the dotted lines
3. Use the tab to glue together the two sides without flaps and form a box shape
5. Fold down the rounded flaps to overlap each other and form a lid (if this is too difficult, simply glue the flaps in place)
