

What you need:

- Your Epson printer
- Good quality A4 paper or card
- Scissors
- Paper glue

Instructions:

1. Make sure your printer's properties are set to high-quality, colour printing
2. Cut out the fox shape. Make two extra L-shaped cuts along the thick black lines the fox's feet, so they can move freely
3. Fold along all the dotted lines, so the non-printed sides touch
4. With the fox face towards you, take the left and right sides and fold them so they meet at the back. Glue the two ends together using the tab
5. Fold up the white square to form the bottom of the cube, tucking the tabs inside and gluing them in place. The fox should now stand on its four feet
6. Fold down the remaining square to form the cube's top, using the tabs to glue it in place.

Your fabulous 3D paper fox is finished.
