

What you need:

- Your Epson printer
- Good quality A4 paper or card
- Scissors
- String or (better) a length of elastic thread or cord

Instructions:

1. Make sure your printer's properties are set to high quality printing
2. Print out your chosen mask (each template features two masks - one adult-sized and one for children)
3. Cut out your mask and the holes
4. Make two small holes where marked for the string
5. Thread the two ends of the string or elastic through the holes so the ends poke out the front. Be sure to use the right length of string or elastic so the mask is a comfortable and snug fit
6. Tie off each end with a knot so it won't slip back through the hole
7. Go out and enjoy Halloween
