

# EPSON OPEN PLATFORM

Unlock the potential of the Epson WorkForce Pro business inkjet range by easily adapting them into web-based enterprise applications and workflows.

Epson Open Platform (EOP) makes our revolutionary multi-function printers (MFPs) fully flexible and customisable, enabling them to adapt to meet specific and changing customer requirements as business goals and enterprise IT systems evolve.

## Join the printer revolution

**Our MFPs offer much more for much less than competing devices. Customers can increase productivity with low running costs, high reliability and reduced user intervention.**

EOP connects you with the benefits of our revolutionary WorkForce Pro range, making your software solutions even more attractive.

## Access new customers

**Reach even more customers by making your solution compatible with our devices.**

Epson is one of the most popular multi-functional printer brands. Add our customers to your addressable market by making your solutions compatible with Epson Open Platform-compliant devices.

## Support popular card readers

**EOP allows for the support of key card reader brands and technologies to adapt to customer requirements.**

If required, EOP can also be customised for the integration of additional readers and technologies.

## Take full control

**Allow users to integrate our devices more easily into their workflow systems.**

Give customers complete control of printing operations and the flexibility to match changing needs with solutions that work across an entire fleet of Epson EOP-compatible devices. This includes customisation of the user interface, management and monitoring of workflows and enhanced security.

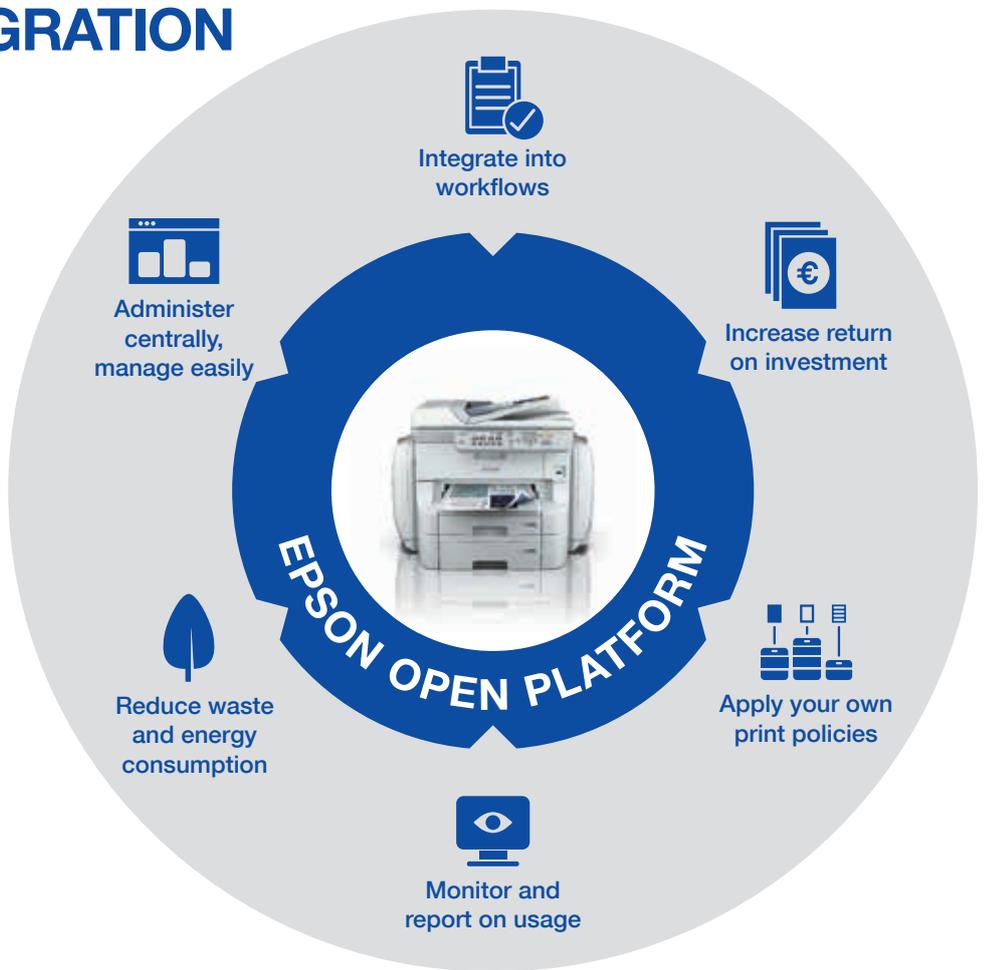

## Rely on Epson

**ISV partners will receive our direct support for easy integration of their solution into EOP.**

The software development kit provided will include comprehensive documents and tools that enable you to integrate your solution with compatible models.

# SIMPLIFIED INTEGRATION

EOP uses standard web services technologies, which means applications can be developed easily, enabling customers to readily integrate the complete range of compatible WorkForce Pro devices into enterprise applications and workflows.

## EOP-compatible hardware

### **WF-R5690DTWF**

Predictable costs with minimal intervention

### **WF-M5690DWF**

Fast, low-energy mono printing

### **WF-5690DWF**

Ecological and low-cost A4 multifunction

### **WF-6590DWF**

Low-intervention printing

### **WF-8590DWF**

Ecological and low-TCO A3+ multifunction

### **WF-R8590DTWF**

Super high-yield printing up to A3+ with predictable print costs

### **WF-8590D3TWFC**

Ecological and low-TCO A3+ multifunction printing

### **WF-R8590D3TWFC**

High capacity, ecological and low-TCO A3+ multifunction printing
